

More than 2 million cubic litres of environmentally controlled storage space

pharmaceutical ICH stability

Vindon provide ICH and unique conditions for stability storage for long term, intermediate and accelerated testing whatever the size of product

2 million cubic litres of space is dedicated to the storage of pharmaceutical products, clinical trial material and pharmaceutical bulk chemicals in temperature and humidity controlled conditions

Stability rooms are fully validated and monitored 24/7/365 and have backup emergency generator systems in place to protect the integrity of all samples.

vaccines, cells low & ultra-low temperature

Bespoke Ultra-low temperature storage solutions from shared units to complete freezers dedicated to individual customers use. We provide primary and secondary storage in GMP compliant conditions, storing vaccines, tissues and other clinical materials as well as laboratory research material.

Comprehensive disaster recovery plans are in place minimising any risk to stored samples.

storage services

Cert No. GB91/0615-01
first registered in 1991

5%RH upto

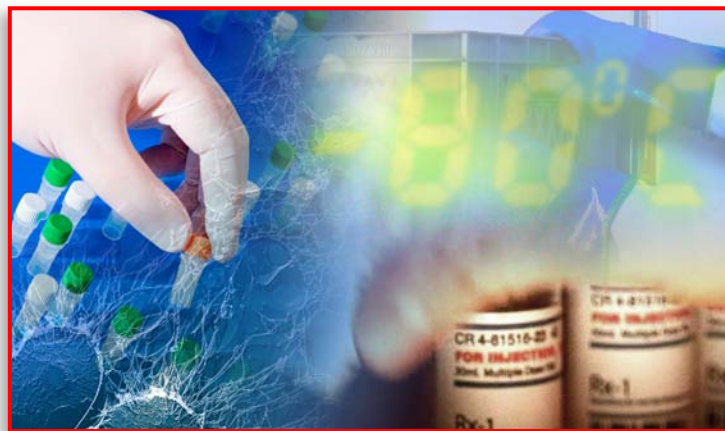

biological, stem cells cryogenic

HTA licensed, Vindon Cryobank is fully equipped with cryogenic freezers. These use Vapour phase technology to minimise the risk of sample contamination.

We partner a wide range of bio-clients and can provide turnkey solutions, collection kits, marketing and coordination as well as storage plans tailored to specific requirements both in terms of volume and time for which the samples are held.

Services include but are not limited to:

- Storage of cells and tissues
- Working and master cell banks
- Second site storage minimising the risk of sample loss
- Disaster recovery planning
- Contingency for unforeseen events including insolvency

care of collections heritage

Designed with the help and guidance of leading preservation experts and entrusted with the British Library's master film archive, Vindon's heritage conservation storage facility is ideally suited to the storage of special collections, historic artefacts and vulnerable film-based media.

Comprehensive preservation solutions can be custom designed to meet the needs of major movie studios, museums, libraries, recording labels, television production companies and advertising agencies.

-196°C -80°C -2°C 5°C upto 80°C
95%RH and virtually any other unique condition

For more than 40 years Vindon Scientific have been manufacturing controlled environment equipment that combines the highest standards in design with a flexibility that ensures our products can suit any customer's requirements.

Our environmental rooms and cabinets provide tightly controlled temperature and humidity conditions.

From small bench top cabinets to walk in rooms, from chest freezers to blood transportation bags, the Vindon brand is respected as a sign of quality around the world.

- Stability Storage Rooms
- Stability Storage Cabinets
- Humidity Chambers
- Cold rooms
- Incubators
- Photostability Cabinets
- Stress Testing Chambers
- Laboratory Fridges & Freezers
- Blood Banks
- Plasma Freezers
- Textile Conditioning Cabinets
- Plant Growth Chambers
- Data Loggers
- Chart Recorders

manufacturing

putting you in control

Vindon control systems include accurate electronic temperature and humidity controllers and indicators. These systems allow almost unlimited programming of temperature and humidity profiles and offer configurable solutions for the secure monitoring of all kinds of laboratory refrigerators, freezers, cold rooms and other temperature and humidity controlled applications.

delivered, installed and commissioned

Vindon provides a complete installation and commissioning service for all our products minimising the potential disruption to valuable research projects.

Experienced and competent Vindon trained technicians work to task-specific method statements, ensuring our equipment is delivered to site, installed and commissioned in the shortest possible time

& installation

setting standards around the world
for more than 40 years

vindon scientific ireland

Temperature and humidity controlled storage services, ultra-low temperature storage and onsite service and validation engineers mean that Vindon Scientific (Ireland) offer a full and comprehensive service to the pharmaceutical, biological and heritage sectors in Ireland.

Offering over 500m³ of storage for stability testing whether for active pharmaceutical ingredients or clinical trial materials, our facility is ideal for primary or secondary storage and disaster recovery.

vindon scientific usa

Vindon Scientific (USA) Inc. provide Pharma and Biopharm storage services across the USA. The storage facility in Kennesaw near Atlanta offers stability and biological storage along with validation and calibration services to the same high levels currently enjoyed by Vindon's European customers.

Vindon Scientific (USA) Inc. also distribute Vindon's controlled environment rooms, cabinets and other equipment to the pharmaceutical research, manufacturing and healthcare markets in the US.

international

now even more capacity in Ireland
storage, services & equipment in the USA

validation and calibration IQ, OQ, CQ, PQ

Vindon's validation department offers full on-site validation and calibration services for environmental rooms/chambers, incubators, refrigerators, freezers and data logging systems, chart recorders, etc.

We work with some of the largest pharmaceutical companies in both the UK and Ireland, providing excellent service whilst building long-standing relationships.

Our Validation department also offers comprehensive training on all aspects of the operation and monitoring of environmental rooms and cabinets. This training is tailored to suit each client's requirements and is available either as part of the installation process of a new room or chamber or ongoing for new personnel.

service and maintenance

Service and maintenance from Vindon is designed from the ground up to each customer's individual requirements.

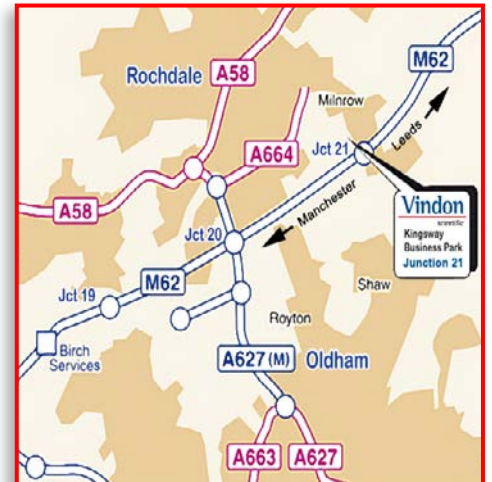

With over 40 years experience providing service to pharmaceutical and related industries, Vindon engineers offer extensive knowledge of almost every type of controlled environment equipment.

24/7/365, Vindon engineers are there to provide unrivalled levels of service and technical support offering immediate and continuous assistance.
